

### Welcome!

**Thank you for choosing BorderNET Internet Pty Ltd as your preferred Supplier of NBN Co's Satellite Service.**

BorderNET Internet has provided satellite solutions for the last 10 years. We pride ourselves on offering exceptional service to customers in rural areas. We are excited to offer the new NBN Satellite service to you.

### Information About The Service

This plan has a Peak Data Allowance of 10 GB and an Off peak Data Allowance of 190 GB.

Both upload and download transmissions are counted towards your monthly Data Allowance.

### Service Bundles

There are no bundles available for this service.

### Equipment Needs

To use this service your computer or router will need an RJ45 Ethernet port to connect to the service using the supplied cable to the satellite modem. Your own WiFi router is required for computers that do not support RJ45 Ethernet

### Minimum Term

There is a 30 day minimum term for this plan.

### What's Included

10 GB of Peak time data where 1 GB (Gigabyte) = 1,000,000 Bytes

190 GB of Off-Peak time data where 1 GB (Gigabyte) = 1,000,000 Bytes

You can use your monthly usage allowance at any time (day or night).

Any unused monthly allowance expires at the end of your billing cycle.

### What's Not Included

If you exceed your 10 GB Peak monthly usage allowance in a month, your broadband service (during peak periods) will be slowed down to 128kbps during Peak times for all usage for the rest of that month until your next billing cycle begins, but you won't be charged extra for use.

If you exceed your 190 GB Off Peak monthly usage allowance in a month, your broadband service (during peak off periods) will be slowed down to 128kbps During Off Peak times for all usage for the rest of that month until your next billing cycle begins, but you won't be charged extra for use.

Any unused usage expires at the end of your billing cycle.

There are no data blocks available with this service at this time.

### BorderNET Satellite Offer Conditions

This service offer is only available to customers who have:

Qualified for a new Sky Muster service Under NBN Co. or migrating an old ISS service previously supplied under NBN Co or transferring from an existing Sky Muster service provided from our competitors after their initial contract has expired.

In all cases the indoor unit (modem), outdoor unit (Antenna, LNB & SSPA) and cabling at the premises must be in working order.

### Limitations, Restrictions, Qualifications and Any Important Conditions

Sky Muster satellite is only available to qualified customers under the NBN eligibility criteria.

NBN have provisioned the service to a maximum speed of 12 Mbps download with 1 Mbps upload speed (this is boosted to 25 Mbps download with 5 Mbps upload speed with the Turbo Boost).

Minimum Service speeds are provisioned at ~150kbps. There is no guaranteed uptime due to the nature of satellite.

Service speeds are measured as the Peak Information Rate for your Satellite device. Your maximum throughput will be lower than this rate and can be effected by: Overheads imposed by Ethernet and other protocols you use such as TCP/IP, the internet service you are accessing, the network between BorderNET and the server you are accessing, the network between BorderNET and your service, local factors such as the performance of your computer equipment including your network router and wireless network and external factors such as weather, signal and the number of users on the NBN network.

You must agree to have NBN Co discuss service quality and market research with you.

You must agree to have BorderNET and NBN Co's installation contractors contact you directly to diagnose faults and make repairs if necessary.

Sky Muster Satellite Services installed under the NBN Co cannot be migrated moved or repurposed for any Other Satellite Service and vice versa.

Standard install timeframes may take up to 60 days from when NBN Co accepts your application. Nonstandard applications may take longer.

VoIP and IPv6 are not supported at this time.

All IP addresses are owned by BorderNET

**Peak, Off peak and Time Zones**

Peak times are defined by NBN Co as 7:00AM – 1:00AM, according to the time zone of your installation.  
Off Peak times are defined by NBN Co as 1:00AM – 7:00AM, according to the time zone of your installation.

**INFORMATION ABOUT PRICING****Minimum Monthly Charge**

The Sky Night 200 plan is \$40.00

**Maximum Monthly Charge**

The Sky Night 200 plan is \$40.00 plus any prorata charges based on part months used due to install timeframes

**Maximum Early Termination Charge**

As this is only a 30 day contract there are no termination charges

**Minimum Price Over the Term of the Contract**

The Sky Night 200 plan minimum price is \$40.00 over the full 30 day contract

**Cost of 1GB of data in Australia**

1 GB of data in Australia under the Sky Night 200 plan is \$0.20

**Other Information**

Customers can obtain their usage and change their plan by logging into the “My Account” section of our website with their customer username and password. This site can be located at <http://bordnet.com.au/login.php> Plan changes are effective from the start of your next bill cycle. Satellite is not recommended for latency-sensitive applications such as online gaming, share trading and live streaming audio and video.
